**Conceptronic to Introduce the First Ever Self-Profiling Reflow Oven**

**Ronkonkoma, NY – January 27, 2006** – Conceptronic / Research International (Division of CVD Equipment Corporation) will be presenting new products at APEX 2006 February 8-10 in Anaheim California. This leading industry event encompasses everyone who designs, manufactures, assembles, and tests printed circuit boards and electronic assemblies.

Conceptronic is introducing the first ever self-profiling reflow oven. This and other new exciting reflow technology in Conceptronic / Research International Booth #909.

**Company Description:**

The Conceptronic / Research International Division of CVD Equipment Corporation, manufacture Solder Reflow Ovens, Forced Convection Rework Stations and Customized Thermal Processing Equipment for customers in the Electronics Manufacturing Industry. Surface Mount Technology (SMT) on Printed Circuit Boards (PCB's) has advanced in complexity and Conceptronic / Research International has innovated with its evolution. From Lead Free Solder to Flux Management and precise heat control of BGA, Micro-BGA and Flip Chip components, our Forced Convection Technology for both inline assembly as well as offline repair, has made Conceptronic / Research International the Technological Leaders of Thermal Processing Equipment in the Electronics Manufacturing Industry.

**Conceptronic, We're hotter than ever.**
